Abstracts

The global Florida digital lending market size was valued at \$4.35 billion in 2019, and is projected to reach \$13.89 billion by 2027, growing at a CAGR of 16.7% from 2020 to 2027.

Digital lending is the process of offering loans, in which lenders use digitized data to inform credit decisions and build intelligent customer engagement. In addition, digitalization allows consumers to register loan requirements online from their smartphones, fill loan applications, and upload the required documents within a few minutes. Digital lending applications swiftly approve customers for a loan and have comparatively lower operating costs due to automated processes.

The ease of applying loans and numerous other benefits for lenders such as automated loan management & rapid approval, are shifting their attention toward digital lending, which is therefore driving the market growth. In Florida, consumers are increasingly demanding short-term & long-terms loans for personal & business needs. Moreover, massive rise in internet usage among individuals and easier access to avail loans from lending firms are promoting the growth of digital lending solutions in the state. However,

lending institutions charge high interest rate for various different loan amounts, which is the major factor that hampers the growth of the market.

On the contrary, major players of the market are introducing new technology to upsurge their market share and to provide customers with enhanced experience, which is expected to provide lucrative opportunity for the Florida digital lending market.

The Florida digital lending market is segmented on the basis of loan type, provider type, loan amount, and end user. Based on loan type, the market is bifurcated into payday loans, personal loans, and SME-focused loans. In terms of provider type, it is segmented into banks, credit unions, fintech institutions, and others. By loan amount, it is segregated into less than USD 500, USD 500-USD 4,999, USD 5000-USD 10,000, and more than 10,000. On the basis of end user, it is segmented into individuals, entrepreneurs, and SMEs.

The report analyses the profiles of key players operating in the market including Ally Financial Inc., Credible, Florida Credit Union, LendingPoint LLC, Navy Federal Credit Union, Social Finance, Inc., Suncoast Credit Union, TD Bank, N.A., VyStar Credit Union, and WELLS FARGO. These players have adopted various strategies to increase their market penetration and strengthen their position in the industry.
