## **Abstracts**

FTTx, or also known as fiber to the x, is used for high speed data communications. The x here is any end-use location may that be home, enterprise, building, desktop, router, office, and many more. The fiber cables made are prone to damage. Plastic pipes of certain qualities are being widely used to curb the direct damage to the cable. The pipes used for FTTX cables are made from thermoplastic polymers as polyethylene and polyvinyl chloride. The fiber cables are now being laid through ducts, pathways, and many more. These ducts and pathways protect cables form damage, ensure safety, and are temperature & chemical resistant.

The FTTx pipes market growth is driven by rise in demand from the telecom industry. The applications of such pipes ensure safety and protection from damage making them ideal choice. In addition, demand from emerging economies, owing to intense competition in the telecom industry also drives the FTTx pipes market growth. However, fluctuating crude oil prices hampers the FTTx pipes market growth. Meanwhile, integration of FTTx pipes in energy infrastructure provides lucrative opportunities for the FTTx pipes industry.
