Abstracts

Fall management involves preventive actions to reduce the risk of accidental falls suffered by older individuals and minimize injuries. Falls and fall-related injuries are the most common medical concern experienced by elderly people. Products used in fall management include sensor pad, radio frequency identification (RFID) tag, and floor mat.

The global fall management market garnered \$152.46 million in 2018, and is estimated to reach \$216.82 million by 2026, growing at a CAGR of 4.5% from 2019 to 2026. The major factors that drive the growth of the fall management market include rise in incidence of disabilities that result from non-communicable diseases, favorable healthcare reforms, and rapid surge in geriatric population coupled with increase in prevalence of chronic diseases. However, high maintenance expense of fall management products is expected to restrain the growth of the global market.

The global fall management market is segmented into product and region. By product, the market is categorized into sensor pad, floor mat, and RFID Tag. Region wise, it is analyzed across North America, Europe, Asia-Pacific, and LAMEA. The global fall management market includes key players such as Alimed, Inc., Curbell, Inc., Deroyal Inc., Emfit Ltd., Medline Industries, Inc., Personal Safety Corporation (PSC), Rondish Company Limited, Smart Caregiver Corporation, Stanley Black & Decker, Inc., and Tidi Products, LLC.

KEY BENEFITS FOR STAKEHOLDERS

The study provides an in-depth analysis of the market along with the current

trends and future estimations to elucidate the imminent investment pockets.

It offers a quantitative analysis from 2018 to 2026, which is expected to enable the stakeholders to capitalize on prevailing market opportunities.

Comprehensive analysis of all geographical regions is provided to determine the prevailing opportunities.

Key players are profiled, and their strategies are analyzed thoroughly to understand the competitive outlook of the global market.
