## **Abstracts**

An HVAC pump plays an important role in heating, ventilation, and air conditioning systems, that are responsible for circulating water or other fluids to maintain efficient climate control and regulate temperature. It is adopted in commercial, industrial and residential applications, to ensure proper distribution of cooled or heated fluids through heat exchanges, radiators and pipes.

Surge in demand for energy-efficient HVAC systems is the major factor driving the growth of the HVAC pump market. In addition, rise in adoption of smart HVAC pumps for enhanced performance and automation, and expansion of industrial and commercial infrastructure, drive the need for advanced HVAC solutions, which help support sustainability goals and optimize energy consumption across industrial, commercial and residential sectors.

However, high investment and installation cost associated with advanced HVAC pump technologies hamper the growth of the HVAC pump market. This limits its adoption among price-sensitive consumers. Moreover, maintenance challenges and technical complexities also limit the HVAC pump market growth.

Nevertheless, rise in government initiatives for sustainable and energy-efficient HVAC

solutions is projected to be opportunistic for the growth of the HVAC pump market. **Introduction** of policies that promote tax credits and green buildings from energy-efficient systems encourage its adoption, this driving the market growth during the forecast period.

## Segment Overview

The HVAC pump market is segmented into pump type, end user, product type, speed control mechanism, and region. By pump type, the market is classified into booster pumps, circulating pumps, centrifugal pumps, and others. By end user, the market is categorized into industrial, residential, and commercial. By product type, the market is bifurcated into single stage, and multi stage. By speed control mechanism, the market is divided into fixed speed pump, and variable speed pump. Region-wise, the market is studied across North America, Europe, Asia-Pacific, and LAMEA.

## Recent Developments

In December 2024, Pentair acquired Florida-based G&F Manufacturing, LLC at \$108 million. Pentair aimed to manufacture & service heat pumps for pools under the Gulfstream brand in the Southeast portion of the U.S. through this acquisition.

In June 2024, Armstrong Fluid Technology opened 29,000-square foot industrial heat-pump manufacturing wing at its Three Rivers, Michigan, campus, U.S. This grant enabled Armstrong to significantly boost its manufacturing capabilities, specifically to produce specialized industrial heat pumps designed for applications that require more than 100 kW of heat and temperatures above 180°F.
