Abstracts

Dental consumables include medical devices such as dental restoration devices, dental sundries, and small equipment, which are used for the treatment of dental problems. The Indian dental consumables market was valued at \$116,397 thousand in 2016, and is projected to reach \$232,527 thousand by 2023, registering a CAGR of 10.3% from 2017 to 2023

The Indian market for dental consumables is expected to witness significant growth during the forecast period due to rise in investments for establishment of multispecialty hospitals offering dentistry, increase in focus of the country to establish itself as a manufacturing hub for dental supplies, and rise in dental tourism in India due to low cost and efficient treatment. However, price sensitivity of the dental consumables due to fluctuating currency exchange rates is expected to restrain the growth of the market. Increased focus of the international players such as Dentsply Sirona, 3M, and others to invest and expand in India is expected to offer lucrative opportunity for the market. The Indian dental consumables market is segmented based on product and location. On the basis of product, the market is categorized into dental restoration, endodontics, and other dental consumables (dental splints, dental sealants, dental burs, dental impression materials, dental disposables, and bonding agents). The dental restoration

segment is further classified based on the materials into metals, polymers, ceramics, and biomaterials. The endodontics segment is categorized on the basis of endodontic files (root canal treatment) into material type and by type. The material type is reclassified into stainless steel files and alloy files, whereas the type is classified into handheld RC files and rotary files. The endodontics segment also includes obturators and permanent endodontic sealers. The dental burs segment is reclassified into long straight shank (HP), latch-type shank (RA), and friction grip shank (FG). By location, the Indian dental consumables market is analyzed across classified into top five metro cities, next 40 towns, and rest of India.

KEY BENEFITS

The study provides an in-depth analysis of the market with current trends and future estimations to elucidate the imminent investment pockets.

The report offers a quantitative analysis from 2016 to 2023, which is expected to enable the stakeholders to capitalize on the prevailing market opportunities.

Extensive analysis by product elucidates the various types of dental consumables used for diverse treatment procedures.

Comprehensive analysis of the country is provided to determine the prevailing opportunities.

Key players are profiled and their strategies are analyzed thoroughly to understand the competitive outlook of the Indian market.
