Abstracts

Instant tea premix serves as an alternative to regular tea, and is frequently used to prepare tea instantly. This type of tea is highly preferred in offices due to its ease of handling and preparation. Rise in preference for ready-made beverages has boosted the popularity of instant tea over the traditional style of consuming tea, as it is quicker to prepare. Their role to regulate blood sugar level, enhance brain functionality, boost metabolism, and provide hydration have notably increased their adoption rate. They are available in the form of powder, paste, and granules; however, powder form of instant tea is preferred among a large consumer base.

The growth of the global instant tea premix market is majorly driven by increase in number of obese & overweight individuals and surge in demand for value-added products. Moreover, the development of distribution channels, including online stores such as Alibaba Inc, Amazon.com Inc., eBay Inc., Wal-Mart Stores Inc. and through convenience stores as well as departmental stores support the growth of the global market. However, volatility in prices of raw materials due to unpredictable weather and increase in trend of instant coffee consumption hamper the growth of the market.

Furthermore, the outbreak of the COVID-19 pandemic led to the disruption of supply chain, which hampered the growth of market, as instant tea is imported from Asian countries to North America and Europe. On the contrary, rise in demand from health-conscious, young population and introduction of new flavors & varieties are anticipated to provide lucrative opportunities for the expansion of the global market during the forecast period.

The major key players profiled in the report study are ITO EN Ltd., The Republic of Tea Inc., the Coca Cola Company, Tata Global beverages, Keurig Green Mountain Inc., Dunkin Brands Group Inc., PepsiCo Inc., Unilever. Wagh Bakri Tea group, and Nestle S.A..

The instant tea premix consumption market is segmented into form, product type, distribution channel, and region. On the basis of form, the market is segmented into powder, paste and granules.
