The global interactive whiteboard market size was valued at \$4.29 billion in 2020, and is projected to reach \$7.35 billion by 2030, to register a CAGR of 6.0% from 2021 to 2030. An interactive whiteboard is an interactive screen in the form of a whiteboard that responds to handler input either directly or via other devices such as digital pen. These devices are used at various places such as corporate board rooms, educational institutions, seminars, and in communicating studios.

The global interactive whiteboard market is anticipated to witness significant growth during the forecast period.
