Intravascular Temperature Management Market Overview:

Intravascular temperature management is a procedure to attain and maintain a specific body temperature of the patient for a defined interval of time, which is mainly used in surgical procedures, hyperthermia, hypothermia, and others. In this procedure, a specified temperature is acquired by using intravascular temperature management systems. This system is employed to infuse hot or cold saline in a patient's body via catheters with closed circuits. The maintenance of temperature prevents surgical site infections in patients undergoing surgical procedures. Intravascular temperature management is also essential in preventing pre- and post-operative hypothermia.

The global intravascular temperature management market was valued at \$261,556 thousand in 2017 and is projected to reach \$335,192 thousand at a CAGR of 3.1% from 2018 to 2025. The growth of this market is majorly driven by increase in prevalence of cardiovascular diseases. In addition, rise in number of surgical procedures performed across the globe, and increase in adoption of intravascular temperature management

across the globe significantly contribute toward the growth of the market. However, high cost of devices hampers the growth of the global market. Conversely, untapped markets in the emerging economies are anticipated to provide lucrative opportunities during the forecast period.

The global intravascular temperature management market is segmented into product, application, indication, end user, and region. Based on product, the market is bifurcated into system and consumables. By application, it is divided into preoperative care, operative care, post-operative care, and acute/critical care. The indication segment is studied across acute myocardial infarction (AMI), stroke, cardiac arrest, fever/infection, and other. Depending on end user, the market is categorized into surgical centers, emergency care units, ambulatory surgical centers, and others. Based on region, it is analyzed across North America, Europe, Asia-Pacific, and LAMEA.
