## **Abstracts**

The global IVF services revenue market generated \$12,506 million in 2018, and is projected to reach \$25,563 million by 2026, growing at a CAGR of 9.3% from 2019 to 2026. In vitro fertilization is an assisted reproductive technology, which involves retrieving eggs from a woman's ovaries and fertilizing them with sperm outside the body, in vitro.

Rise in infertility rate, increase in trend of delayed pregnancies, surge in IVF success rate, and rise in disposable income worldwide are the factors that are anticipated to boost the growth of the global IVF services market during the forecast period. However, factors such as complications associated with IVF treatment, high cost, and low awareness level for IVF in some underdeveloped regions hinder the growth of the market. Conversely, increase in fertility tourism and surge in number of fertility clinics are anticipated to offer lucrative opportunities for market growth in the near future.

The global IVF services market is segmented into cycle type, end user, and region. Depending on cycle type, the market is divided into fresh IVF cycle (non-donor), thawed IVF cycle (non-donor), and donor egg IVF cycle. According to end user, it is classified into fertility clinics, hospitals, surgical centers, and clinical research institutes. Region wise, it is studied across North America (U.S., Canada, and Mexico), Europe (Germany, France, UK, Italy, Spain, Russia, Denmark, and rest of Europe), Asia-Pacific (China,

Japan, Australia, India, Thailand, New Zealand, South Korea, and rest of Asia-Pacific), and LAMEA (Latin America, Middle East, and Africa).

## KEY BENEFITS FOR STAKEHOLDERS

The study provides an in-depth analysis of the market with current trends and future estimations to elucidate the imminent investment pockets.

It offers a quantitative analysis from 2018 to 2026, which is expected to enable the stakeholders to capitalize on prevailing market opportunities.

Comprehensive analysis of all regions is provided to determine the prevailing opportunities.

Key players are profiled to understand the competitive outlook of the global market.
