Abstracts

Manufacturing operations management (MOM) is a set of processes that provides a holistic solution for complete visibility into manufacturing processes. The use of MOM software helps industries improve performance of manufacturing operations. MOM is a successive system to Manufacturing Execution System (MES). With integration between MES and MOM systems, MOM software is capable to consolidate production processes to improve advanced planning and scheduling, quality management, R&D management manufacturing execution systems, and other such functionalities.

As manufacturers are trying to regain their equilibrium amidst continuous volatility in costs and quality policy decisions MOM software has proliferated its demand. This is attributed to MOM software's capability to promote compliance with standards and specifications for operational processes and procedures. This is one of the major factors expected to drive the growth of the global manufacturing operations management

software market. Furthermore, advent of industry 4.0 has flourished the adoption of advance software, which provides platforms to leverage diversified data source or silos and extract all-encompassing insights to further improve the manufacturing facility's quality, productivity, and other operation efficiencies. Aforementioned is a factor expected to boost growth of the market during the forecast period. However, connectivity and proliferation of cloud-based MOM software rises concerns associated with data privacy and cyber security, which in turn could hinder the manufacturing operations management software market growth. As digital data is rapidly increasing, advances in Internet technology, IoT, big data analytics, cloud computing, and AI have profoundly impacted the manufacturing industry and is an opportunistic factor of the market.

The manufacturing operations management software market is segmented on the basis of component, functionality, enterprise size, industry vertical, and region. By component, it is categorized into software and services.
