Abstracts

Metals & metal manufactured products are the most valuable commodities, which are employed in a wide range of industries such as construction, aviation & automobile, electrical & electronics, jewelries, and others. Various metals are extracted via mining from their particular ores present in the earth's crust and can be categorized into ferrous and nonferrous metals based on their iron composition. Metals are further processed via casting, forming, or joining methods to form metal manufactured products such as wire & cable, jewelry & ornaments, bars, sheets, rolls, pipes, fixtures & fittings, rebar, molded components, and others.

The growth of the global metal & metal manufactured products market is majorly driven by increase in demand from various end-use sectors, such as & aviation, healthcare, electrical & electronics, energy & power, infrastructure, personal care, and others. Moreover, technological advancements and surge in demand for metals & metal manufactured products from the automotive industry are other factors supporting the expansion of the global market. However, volatility in raw material prices and increase

in competition from substitutes are anticipated to hamper the market growth during the analysis period.

Conversely, rise in demand for metals in emerging economies and increase in use of recycled metal & related products are the factors representing great opportunities for the growth of the market.

The report segments the global metal & metal manufactured products market based on metal type, product, and geography. By metal type, the market is categorized into aluminum, beryllium, bismuth, cadmium, cerium, chromium, cobalt, gold, indium, iron, lead, lithium, magnesium, manganese, mercury, and molybdenum. On the basis of metal manufactured product type, it is fragmented into wires & cables, jewelry & ornaments, electrical & electronics, bars, sheets, rolls, pipe fixture & fittings, pipes, molded components, rebar, and others. Geographically, it is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

Comprehensive competitive analysis and profiles of major market players (manufacturers and key users of metal & related products) in each country is detailed thoroughly in the report.
