## **Abstracts**

Non-fused switch disconnectors de-energizes electric circuit for service and maintenance. These disconnectors find different applications in power distribution, buildings, and several industry verticals, which include material handling operation, automotive, official buildings and others. Moreover, rise in electrical supply networks in the developing nations provides ample of opportunities for the growth of the market. The global non-fused switch disconnectors market is expected to register significant growth during the forecast period attributed to rise in urbanization and industrialization in the emerging market, such as China and India. Further, rise in the safety concern of labor and worker among the industrialists fuels the market growth. However, fluctuation in the price of raw materials used to manufacture non-fused disconnectors is expected to hinder the growth of the market.

The report segments the non-fused switch disconnectors market based on electric phase, voltage, application, and region. Based on electric phase, the market is bifurcated into single phase and three phase. Based on voltage, it is categorized into high, medium, and low voltage. Based on application, the market is classified into commercial and residential. Based on region, the market is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

Comprehensive competitive analysis and profiles of major market players such as Siemens AG, Schneider Electric SE, ABB Ltd., General Electric Company, Eaton Corporation, WEG SA, Havells India Ltd., Littelfuse Inc., Mitsubishi Electric, and Delixi Electric Co. Ltd is also provided in this report.
