Abstracts

Family/indoor entertainment centers (FECs) are miniature indoor entertainment centers, which offer a variety of entertainment activities to individuals of all ages. FECs are primarily designed to offer a variety of games such as video games, machine-based games, arcade games, gaming consoles, and VR-based games. They are more preferred as an entertainment and leisure option by families over the outdoor

entertainment centers, as environmental factors and climate changes do not affect the experience of customers.

Factors such as growth in per capita disposable income, availability of diversified gaming and entertainment options, and integration of new technologies such as 3D technology & virtual reality (VR) gaming in FECs are driving the growth of the North America family/indoor entertainment centers market. However, availability of home gaming & mobile devices, high initial cost, and increase in ticket prices majorly restrict the market growth. Furthermore, continuous launch of new FECs supporting family activities, food & beverages integration, and participatory play are anticipated to boost the growth of the family/indoor entertainment centers market. Moreover, substantial growth in investments by malls in North America region is expected to provide remunerative opportunities for the growth of the market.

The global family/indoor entertainment centers market is segmented into visitor demographics, facility size, revenue source, application, type, and region. In terms of visitor demographics, the market is categorized into families with children (0–8), families with children (9–12), teenagers (13–19), young adults (20–25), and adults (Ages 25+). On the basis of facility size, it is divided into up to 5,000 sq. ft., 5,001–10,000 sq. ft., 10,001–20,000 sq. ft., 20,001–40,000 sq. ft., 1–10 acres, 11–30 acres, and over 30 acres. Depending on revenue source, it is classified into entry fees & ticket sales, food & beverages, merchandising, advertisement, and others. The applications covered in the study include arcade studios, AR and VR gaming zones, physical play activities, skill/competition games, and others. As per type, the market is segregated into children's entertainment centers (CECs), children's edutainment centers (CEDCs), adult entertainment centers (AECs), and location-based VR Entertainment Centers (LBECs). Country wise, the market is analyzed across the U.S. and Canada.

The North America family/indoor entertainment centers market is dominated by Cinergy Entertainment Group, CEC Entertainment, Inc., Dave & Buster's, Inc., Disney, Lucky Strike Entertainment, Scene75 Entertainment Centers, SeaWorld Entertainment, Inc., Main Event Entertainment, iPlay America, and White Hutchinson Leisure & learning group, Inc.
