Abstracts

Oilfield auxiliary equipment are machines and instruments that are used to supplement the drilling process at oilfields. The equipment used less frequently on the oilfield are availed on rent by various oil extraction companies. The auxiliary equipment consist of sewage systems, mud labs, lighting system, distribution panels, storage tanks, debris junk catchers, transportation system, heat exchangers, flaring systems, drilling instruments and others. The major factors driving the oilfield auxiliary rental equipment market include the rising demand for energy sources, impending need for cost optimization and increasing deep offshore oil production activities. However, some of the restraints associated with the market are the advent of automated systems and lack of skilled workforce. The impact of automated systems is expected to affect the auxiliary rental equipment market in near future.
