Orthodontic Supplies Market Expected to Garner \$14.1 Billion by 2033, Growing at a CAGR of 7.8%

Abstract: The global orthodontic supplies market is expected to grow primarily due to the rising prevalence of malocclusions and the rising awareness among individuals about orthodontic treatment. The North America region is predicted to witness profitable growth by 2033.

As per the report published by Research Dive, the global orthodontic supplies market was valued at \$6.8 billion in 2023 and is expected to register a revenue of \$14.1 billion by 2033 at a CAGR of 7.8% during the forecast period 2024-2033.

Dynamics of the Market

The growing awareness among individuals about the orthodontic treatment and the growing preference for minimally invasive treatments are expected to make the orthodontic supplies market a highly profitable one in the forecast period. Besides, with the aging global population, orthodontic problems among adults are becoming more common, resulting in a rising demand for orthodontic supplies.

However, according to market analysts, lack of awareness and stringent regulations & standards associated with orthodontic supplies might restrain the growth of the market.

Moreover, the digitalization and the integration of IoT in the orthodontic solutions is expected to propel the orthodontic supplies market forward in the coming years.
