Abstracts

A tyre is a component fitted around the rim of a wheel to transfer the load of a vehicle from the axle to the ground. Rubber tyre consists of tread, jointless cap piles, beads, and other materials, which include synthetic rubber, carbon black, and fabric. The major function of the tyre is to protect the wheel rim and offer tractive force between the road surface and the vehicle. Since, it is manufactured from rubber, it also provides a flexible cushion, thereby reducing the impact of the vibrations and absorbs the shock of the vehicle. There is an exponential increase in the demand for tyre due to the rise in vehicle production in Pakistan to cater the increase in requirement of vehicles across all segments. Thus, the tyre demand is ultimately governed by automobile production.

The seats used in most of the passenger and light commercial vehicles have main parts that includes tread, textile cord ply, liners, and beads. The combination of such components are responsible for ripping the road and providing directional stability and wear-and-tear resistance.

The Pakistan rubber tyre market is segmented based on tyre type, component, design, vehicle type, and region. Pneumatic rubber tyre, retreaded rubber tyre, rubber inner

tubes, cushioned and solid rubber tyre, and others are studied under the tyre segment. Based on component type, the market is divided into tyre, tubes, and valves. Radial and bias types are categorized under design type. Whereas, passenger car, commercial vehicles, two wheeler, three wheeler, agriculture tractor, and OTR/TBR tyre are analyzed under the vehicle type segment. Based on region, the market is studied across Pakistan.

The key players analyzed in the automotive seat market include General Tyre and Rubber Co. Ltd., Servis Tyre, the Goodyear Tyre & Rubber Company, Bridgestone group, Pirelli Tyre S.p.A, Michelin, Ghauri Tyre & Tube Ltd., Continental Corporation, Sumitomo Rubber Industries Ltd., and Yokohama Rubber Co., Ltd.
