Abstracts

Password management is the process of securing and managing passwords throughout their life cycle. This is achieved with the assistance of password managers, who use built-in encrypted vaults to store privileged credentials. Password manager is a software application that stores and organizes login credentials, usernames, and passwords, logging users in automatically to websites. Furthermore, it is an attempt to improve password usability and security, enabling users to create unique, complex passwords for every online account without needing to remember them. All information is securely stored in a password vault and accessible via the password manager.

One of the key drivers of the password management market is the rise in adoption of remote work culture among various businesses. Furthermore, increase in demand for convenient authentication methods drives market growth. In addition, cybersecurity concerns among consumers have accelerated the market growth. Password management systems play a vital role in protecting sensitive data and reducing the risk

of cyberattacks. These systems help users create and manage strong, unique passwords for all their accounts, streamlining the process of maintaining good password hygiene. Thus, this factor propels the growth of the password management market. However, lack of awareness among individuals & businesses and technical limitations are some of the factors that hamper the password management market growth. On the contrary, the rise in online accounts and an increase in adoption of cloud-based services are expected to provide lucrative growth opportunities to the password management market in the upcoming years.

The password management market is segmented into type, access, enterprise size, industry vertical, and region. On the basis of type, the market is bifurcated into self-service password management and privileged user password management. On the basis of access, it is fragmented into mobile devices, desktops & laptops, voice-enabled password systems, and others. On the basis of enterprise size, the market is bifurcated into large enterprises and small and medium-sized enterprises. On the basis of industry vertical, the market is divided into BFSI, IT and telecom, healthcare, retail, government and public sector, manufacturing, and others. On the basis of region, the market is segmented into North America, Europe, Asia-Pacific, and LAMEA.

The key players operating in the password management market include Bitwarden, Inc., Dashlane Inc., Zoho Corporation Pvt. Ltd., 1Password, Nord Security, NortonLifeLock Inc., One Identity LLC, SailPoint Technologies, Inc., LastPass US LP, and Siber Systems, Inc. These players have adopted various strategies to increase their market penetration and strengthen their position in the password management industry.
