Abstracts

Patch cables are also known as patch cords as it has connectors on both ends that are used to connect an end device to a power source. Similar to Ethernet cables, there are fiber patch cable and Ethernet patch cable, such as LC fiber patch cable or Cat6 RJ45 patch cable. Patch cables are often used for short distances in offices and wiring closets. Ethernet patch cable can link a computer to a network hub, router or Ethernet switch, which is useful for constructing home computer networks.

Patch cables can be short as three inches or longer than a hundred feet. Cat 5, Cat 5E, and Cat 6 Ethernet cables are common examples, used to connect computers together in a network as well as network servers. Patch cables enhance the performance of connected devices via high-speed data transfers. In addition, these cables have several benefits such as lower latency, low noise interference, easy installation, and reliability.

At present, data transfer and networking has become an essential part of all commercial activities in industries, business, broadcast, and others. These commercial activities generate large amounts of data daily, which needs to be transferred between devices with appropriate security. Thus, patch cables are used for networking and non-networking connections in industries. Patch cables are the most popular and reliable for residential, institutional, healthcare, IT & network security, and enterprise users as they

are easy to install, secure, and exhibit various benefits over other connecting techniques.

The patch cable market exhibits a phenomenal growth owing to the increase in demand for high-speed connectivity devices & systems and improvement in cable technology. However, negative impact of Internet-of-things in the region hampers the North American market to a certain extent. Furthermore, increase in development of data centers and emergence of 5G revolution provide lucrative opportunities for the market growth.

The patch cable market segmented on the basis of product type, cable category, application, end use, and region. Based on product type, the market is bifurcated into copper cable and fiber optic. By cable category, the market is divided into CAT3, CAT5, CAT5E, CAT6, CAT6A, CAT7, multimode optical fiber, RG6, and others. By application, the market is divided into networking and non-networking. Based on end use, the market is categorized into industrial, enterprise, IT & network security, and others. The regional analysis is given for North America, Europe, Asia Pacific and LAMEA along with its prominent countries.

The key players profiled in the report include Black Box, CommScope, Corning, CP Technologies, General Cable, Legrand North America LLC, Major Custom Cable Inc., Panduit Corp, Quabbin Wire & Cable Corporation, and Schneider Electric.
