## **Abstracts**

Premium salicylic acid is an important compound in pharmaceuticals, healthcare, and cosmetics owing to its widespread application in the treatment of diseases such as dandruff, acne, psoriasis, and others. Acetylsalicylic acid, salicylic acid amine, methyl salicylate, sodium salicylate, and phenyl salicylate are the main products manufactured from premium salicylic acid.

Among these products, acetylsalicylic acid (Aspirin) is produced majorly, and this is done by esterification reaction between salicylic acid and acetic anhydride utilizing sulfuric acid as a catalyst. Aspirin is an anti-inflammatory drug widely used to cure pain, reduce inflammation, and lower fever. Premium salicylic acid is an important compound in skincare and haircare industry, owing to its applications in the treatment of dermatological and inflammatory diseases. Manufacturers of premium salicylic acid carefully comply with the regulations and norms drawn by the public authorities in Europe, Asia, and U.S. to safeguard human health and the environment.

There are myriad growth drivers for the world salicylic acid market including increasing usage of salicylic acid in dermatological treatment industry, rising demand for aspirin drug worldwide, and growing application scope in personal care products. Salicylic acid is harmful to skin and its overexposure may lead to skin irritation, breathing problems,

and digestive disorders. Consumer awareness about these factors can moderately hinder the growth of this market. High adoption in medical cosmetics and increasing demand from emerging economies like Asia-Pacific offer various growth opportunities.

The world premium salicylic acid market is segmented on the basis of application and geography. Premium salicylic acid is applicable in various industries including pharmaceuticals, skin care, hair care, food & beverages, and others. Each application is further classified into sub-categories such as pharmaceuticals into PC and OTC; skincare into moisturizer, sunscreen, and acne solution; and haircare into conditioner and shampoo. Geographically, the market is segmented into North America, Europe, Asia-Pacific, and LAMEA.

The market, with its surging demand in end applications, has witnessed high growth during the past few years, and this growth trend is estimated to continue in the future too. Key players are investing in R&D activities such as use of aspirin in treatment of cardiovascular diseases and development of increased applications for the products formed.

Siddharth Carbochem Products Ltd., Novacap, Alta laboratories Ltd., Alfa Aesar GMBH & Co KG, Simco QC, J. M. Loveridge Ltd, Zhenjiang Gaopeng Pharmaceutical Co., Ltd, Hebei Jingye Group, Shandong Xinhua Longxin Chemical Co. Ltd are few of the leading players profiled in the report.
