## **Abstracts**

The global prostate cancer treatment market was valued at \$6,887 million in 2018, and is projected to reach \$9,904 million by 2026, registering a CAGR of 4.6% from 2019 to 2026.

Prostate cancer is a type of cancer that develops in the male reproductive system. It is asymptomatic, and grow slowly at its earliest stages. Furthermore, it is the second most common cancer in male after skin cancer. In case of treatment, the initial stage of prostate cancer are treated by radiation therapy, and for the last stages, where tumor has spread beyond the prostate gland, drug therapies are recommended. The drug therapies include chemotherapy, biological therapy, and hormone therapy. Xtandi and Zytiga are the major therapeutic drugs that are used for the treatment of prostate cancer.

Significant increase in prevalence of prostate cancer, rise in geriatric population, surge in awareness among people regarding the treatment of prostate cancer, increase in demand for prostate cancer treatment products, and rise in uptake of hormonal agents in non-metastatic castration resistant (nmCRPC) & metastatic hormone nave (mHNPC) prostate cancer settings are the key factors that fuel the growth of the prostate cancer treatment market. Moreover, availability of new prostate cancer treatments, strong

emerging pipeline drugs, improved R&D investment by drug innovators, enhanced diagnosis & incidence rates in developed economies, increase in generic products, and rise in pharmaceutical industries & diagnostic centers across the globe contribute toward the growth of the market. However, prolonged treatment durations and poor demand for prostate cancer treatment drugs in underdeveloped countries are expected to hinder the growth of the market.

The prostate cancer treatment market is segmented on the basis of drug type, distribution channel, and region. By drug type, the market is categorized into chemotherapy, biological therapy, hormone therapy, and others. Depending on distribution channel, the market is classified into hospitals pharmacies, drug stores & retail pharmacies, and online pharmacies.
