## **Abstracts**

The global ready mix concrete market size was valued at \$491,619 million in 2018, and is projected to reach \$766,636 million by 2026, growing at a CAGR of 5.5% from 2019 to 2026. Readymix concrete is a ready to use mixture of water, aggregates, sand, and cement. The mixture is made according to the specification in a concrete manufacturing plant and delivered to the site. The advantages of ready-mix concrete include its requirement of less workforce, elimination of on-site storage spaces, reduction in processing time, noiseless operation, and low dust production. In addition, its features include high quality concrete, and better convenience.

The factors such as increase in demand for readymix concrete sustainable infrastructure and growth in urbanization and industrialization in developing countries drive the market growth. However, loss of workability in ready mix concrete may hamper the market growth. Furthermore, increase in government and private investments in the infrastructure sector is expected to offer lucrative opportunities for the market player during the forecast period.

The global ready mix concrete market is segmented on the basis of type, application, and region. By type, the market is transit mix concrete, central mix concrete, and shrink mix concrete. By application, it is divided into commercial & infrastructure, residential, and industrial. By region, the market is analyzed across North America, Europe, Asia-

Pacific, and LAMEA.
