## **Abstracts**

Self-driving truck is also known as autonomous truck and robotic truck. Self-driving trucks feature all the major competencies of traditional trucks. Further, the vehicle can be both fully autonomous and partially autonomous, which require driver as assistant to operate.

The global self-driving truck market is expected to register significant growth during the forecast period attributed to rise in growing environmental concern. Moreover, factors such as reduced wind drag, less road accidents, decongestion of traffic, and others fuel the market growth. However, the threat of hackers and increase in cybercrime restrict the market.

The report segments the self-driving truck market based on level of autonomy, industry vertical, and region. Based on level of autonomy, the market is divided into level one, level two, level three, and level four. Based on industry vertical, the market is classified into logistics, construction & manufacturing, mining, and port. Based on region, the market is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

Comprehensive competitive analysis and profiles of major market players such as BMW AG, Isuzu Motors Limited, General Motors, Otto motors, AB Volvo, Daimler AG, Tesla, Waymo, Toyota and Volkswagen is also provided in this report.
