Abstracts

The swimming pool construction market was valued at \$6,773.2 million in 2019, and is expected to reach \$7,392.6 million by 2027, registering a CAGR of 3.8% from 2020 to 2027. The swimming pool construction market includes revenue generated by construction of new swimming pools and renovation of old swimming pools in residential and commercial infrastructures. Swimming pools are customized as well as constructed in standard shapes and sizes using fiberglass, vinyl liner, and concrete. The construction type offered are in-ground and above-ground depending on the requirement of the user.

Awareness in fitness, owing to rise in number of diseases has led to construction of new gyms consisting of swimming pools as well as renovation of old gyms and swimming pools by equipping them with modern components and accessories. In addition, there has been rise in travel and tourism globally, which has led to construction of new hotels and rented bungalows along with renovation of old hotels and rented bungalows with swimming pools in them. Increase in per capita income of people has led to luxurious lifestyle, owing to which a large number of swimming pools are being built in backyards of residential houses. However, the high construction cost and maintenance cost of swimming pools act as a restraint to the swimming pool construction market. On the contrary, introduction of advanced technologies, such as innovative IoT, in heating, filtration, and other swimming pool systems decreases the maintenance cost and helps

to provide lucrative opportunities for the swimming pool construction market growth.

The swimming pool construction market is segmented into material, construction type, end user, and region. On the basis of material, the market is divided into concrete, fiberglass, vinyl liner and steel frame. By construction type, it is segregated into above-ground and in-ground. Depending on end user, it is classified into residential and non-residential. By region, it is analyzed across North America (the U.S., Canada, and Mexico), Europe (Germany, the UK, France, Spain, and Rest of Europe), Asia-Pacific (China, India, Japan, South Korea, and Rest of Asia-Pacific), and LAMEA (Latin America, Middle East, and Africa).
