## **Abstracts**

The major function of a transmission control system is calculating the right place and time for changing the current gear of a vehicle to provide smooth and efficient driving experience. Apart from this function, this system also sends on board diagnosis signals to vehicle's computer in case if any malfunction is detected in transmission. Failure to change gears, stalling between gear changes, and failure in transmission downshifting are some of the problems of the system that occur often.

The market is anticipated to witness a significant growth during the forecast period, owing to the growth in trend of autonomous vehicles.

The global transmission control system market is segmented on the basis of installation, vehicle type, and region. On the basis of installation, it is divided into integrated and stand-alone. By vehicle type, it is categorized into passenger vehicle, commercial vehicle, and electric vehicle. Region wise, it is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

The key players analyzed in the Transmission Control System market include Continental AG, Robert Bosch, BorgWarner, Delphi Technologies, Denso Corporation, Dana Limited, Infineon Technologies, Eaton, Allison Transmission Inc., ZF Friedrichshafen, and others.
