Abstracts

The global urinary self-catheters market was valued at \$1,722 million in 2018, and is projected to reach \$2,387 million by 2026, registering a CAGR of 4.1% from 2019 to 2026.

A urinary catheter is a hollow, partially flexible tube, which is used to drain the urine when an individual is unable to do it naturally. These catheters consist of a drainage bag that assists to collect a urine. They are composed of silicone, PVC, or vinyl or red rubber latex.

The urinary self-catheter market is expected to exhibit significant market growth during the forecast period, owing to increase in prevalence of benign prostate hyperplasia (BPH), urinary incontinence, and spinal cord injuries; rise in number of surgeries, and increase in geriatric population. Upsurge in demand for hydrophilic intermittent catheters and favorable reimbursement policies for usage of urinary catheters further supplement the market growth.

Innovations in catheters, novel product launches, and rise in demand for intermittent catheters in emerging economies provide lucrative opportunities for the market expansion. However, the availability of substitutes of catheters and lack of awareness

toward utilization of self-catheters hamper the market growth.

The global urinary self-catheters market is segmented based on product, type, application, and region. Depending on product, the market is bifurcated into intermittent catheters and external catheters. Intermittent catheters are further classified into uncoated intermittent catheters and coated intermittent catheters. Coated intermittent catheters are subsegmented into antimicrobial, hydrophilic, and others. According to type, the market is categorized into male type catheter and female type catheter. By application, it is divided into benign prostate hyperplasia (BPH), urinary incontinence, spinal cord injuries, and others. Region wise, it is studied across North America (U.S., Canada, and Mexico), Europe (Germany, France, the UK, Italy, Spain, and rest of Europe), Asia-Pacific (China, Japan, Australia, India, South Korea, Taiwan, and rest of Asia-Pacific), and LAMEA (Brazil, South Africa, Saudi Arabia, Turkey, and rest of LAMEA).
