Abstracts

A machine based process for the management of warehouse inventory is termed as warehouse automation. It helps workers handle the inventory from the moment it enters the warehouse to it leaves the warehouse. Automated machines and different material handling components are used to automate the warehouse and optimize the warehouse operation. This also makes inventory management cost-effective and error-free.

There has been a rise in the popularity of e-commerce, owing to associated convenience with online purchase, which increases the need for warehouses and thus related automation. Management of products and facilities, such as same day or next day delivery also requires automation, to make this process error-free. In addition, rise

in disposable income and introduction of favorable government policies related to e-commerce industry increase the need for warehouse automation. These factors boost the growth of the warehouse automation market.

However, high initial cost that is required to automate warehouse is the major factor that limits the growth of the warehouse automation market. In addition, implementation of robotics, warehouse management systems, and automated guided vehicles, and setting up the required infrastructure involves high cost, which is not affordable for small businesses. This limits the growth of the warehouse automation market.

Nevertheless, advancements in technology that enhance automated material handling machines are projected to provide lucrative opportunities for the growth of the warehouse automation market. Innovations in automation, which include IoT-enabled tracking, AI-driven picking systems, and more are expected to reduce labor dependency and handle material efficiently. These factors are projected to foster the warehouse automation market growth during the forecast period.

The warehouse automation market is segmented on the basis of solution, application, end-use industry, and region. Based on solution, the market is divided into automated storage and retrieval systems, conveyors and sortation systems, robotics systems, picking and packing equipment, palletizing and depalletizing systems, sensors and scanners, others hardware, warehouse management system, warehouse control system, warehouse execution system, and others software. Based on application, the market is classified into automotive, food and beverage, e-commerce, pharmaceutical, fashion and apparel, cosmetics, and others. Based on end user industry, the market is fragmented into retailers, and manufacturers and distributors. By region, it is analyzed across North America (the U.S., Canada, and Mexico), Europe (UK, Germany, France, Italy, Spain, Netherland, and rest of Europe), Asia-Pacific (China, Japan, India, South Korea, Australia, Indonesia, Vietnam, and rest of Asia-Pacific), and LAMEA (Brazil, Argentina, Saudi Arabia, UAE, South Africa, Kenya, Rest of LAMEA).

Key companies profiled in the warehouse automation market report include Amazon.com, Inc., Atmos Systems, FANUC CORPORATION, ABB, Zebra Technologies Corp (Fetch Robotics, Inc.), Honeywell International Inc., Omron Corporation, Schneider Electric, KION GROUP AG (DEMATIC), Siemen, YASKAWA ELECTRIC CORPORATION, SSI SCHAEFER Group, Bastian Solutions LLC, Daifuku Co., Ltd., Jungheinrich AG, KUKA AG, and Falcon Autotech. The major players that operate in the global market have adopted key strategies such as product launch, collaboration, partnership, and business expansion to strengthen their market outreach

and sustain competition in the market.

Additional benefits you will get with this purchase are:

Quarterly Update and* (only available with a corporate license, on listed price)

5 additional Company Profile of client Choice pre- or Post-purchase, as a free update.

Free Upcoming Version on the Purchase of Five and Enterprise User License.

16 analyst hours of support* (post-purchase, if you find additional data requirements upon review of the report, you may receive support amounting to 16 analyst hours to solve questions, and post-sale queries)

15% Free Customization* (in case the scope or segment of the report does not match your requirements, 15% is equivalent to 3 working days of free work, applicable once)

Free data Pack on the Five and Enterprise User License. (Excel version of the report)

Free Updated report if the report is 6-12 months old or older.

24-hour priority response*

Free Industry updates and white papers.

Possible Customization with this report (with additional cost and timeline, please talk to the sales executive to know more)
