Abstracts

Wi-Fi as a service (WaaS) is a subscription-based service that combines three key elements, including infrastructure, software, and managed services. It is a high-speed Wi-Fi solution that is fully managed using cloud-based management systems for connectivity as well as for the configuration of the Wi-Fi network. The most significant benefit of managed Wi-Fi services is the ability to put responsibility for Wi-Fi network performance in the hands of a team of highly experienced experts.

Increase in requisite for low capital expenditure and rise in deployment of public Wi-Fi majorly drive the growth of the Wi-Fi as a service market. In addition, expediency of Wi-Fi infrastructure management and its remote troubleshooting boost the growth of the market. However, lack of data security concerns is expected to hamper the growth of the market. Conversely, increase in adoption of IoT is expected to provide major opportunities for the growth of the Wi-Fi as a service market in the next few years.

The global Wi-Fi as a service market is segmented into service, location type, enterprise size, industry vertical, and region. By service, the market is divided into professional services and managed services. Professional services segment is further categorized
