Abstracts

Control valves are used to regulate process variables such as flow, temperature, pressure and fluid level in the process industries like oil & gas, water management, chemicals, power generation, automotive, mining, pharmaceuticals, food & beverages and many others. Control valves play an important role in increasing efficiency, safety and profitability of these process industries. Furthermore, the manufacturers of control valves are constantly engaging in research and development activities to design their products in accordance with the changing requirements in various industries.

The main drivers for the growth of control valves market are gradual increase in the need for automation in the process industry, the rising number of industrial infrastructure projects in developing countries and the ever increasing investment across all the process industries especially oil & gas industry. Additionally, the demand for control valves is expected to be high in the pharmaceutical industry. High energy demand integrated with growing population is one of the major factors driving the control valves market growth. Inefficient logistics and supply system across the world is one of the challenges for control valves market in the period 2014-2022.

The world control valves market has been segmented on the basis of product types, application and geography. Based on product type the market is segmented into pneumatic, hydraulic and electric control valve. In terms of application is the market can be bifurcated into electrical power, oil & gas, water & waste-water, pharmaceuticals,

automotive, chemicals, mining, food & beverage and others. Based on geography, the world control valves market is segmented into North America, Europe, Asia-Pacific, and LAMEA (South America, Middle East and Africa).

World Pneumatic control valve market growth, 2014-2022 (%)

World Pneumatic control valve market growth, 2014-2022

Top Factors:

Increasing investment in fluid handling technology

Increasing investment in fluid handling technology in oil & gas and pharmaceutical industries is driving the control valve market. Pharmaceutical industries seek to develop the sophisticated fluid handling system for improving in order to improve hygiene and also to speed up the process. Oil & gas industries are increasing their investment in the shale gas field as well as pipeline installations to ensure efficient fluid handling which in turn increases the demand for control valves. Thus, increasing investment in fluid handling system is positively impacting the control valve market in the forecast period, 2014-2022.

High energy demand

With surging population trend, the energy demand is growing substantially as well. Additional electrical power generation is demanded in the countries like China and India in the forecasted period, 2014-2022.

Developing economies

BRICs nations (Brazil, Russia, India and China) and Middle East are continuing to support the control valve market due to the high consumption from the growing middle class and the need for producing and saving energy to cope with rising energy demand and demand for supply of clean potable water. Future projects in these nations will be expected to bring solid returns

Rising demand for upgrading waste management facilities

Increasing demand for safe and efficient waste collection and waste disposal facilities will drive the control valve market in the upcoming years. Under the environment, health and safety guidelines, waste management projects in India such as closure and redevelopment of Andhra Pradesh dump at Kadapa and other important projects are getting upgraded. This in turn, impacts the control valve market.

Strict Environmental regulation

Regulations regarding environmental pollution are being subjected in the designing of control valves. These regulations regarding environmental pollution will be expected to become tougher in the upcoming years. This will in turn, impact the design and the sales of the control valves. The sales of those valves which promote environmentally sustainable practices across various industries will be boosted significantly in the future. Some of the major players in the control valve market are Emerson Electric Co. (U.S.), Flowserve Corporation (U.S.), Metso Corporation (Finland), Pentair Plc (UK), General

Electric Company (U.S.), Samson AG (Germany), MIL Control Limited (India), Crane Fluid Inc (U.S.), IMI Plc (UK), Velan Inc. (Canada), Crane Co. (U.S.) and Flowserve corporation (U.S.).

Key benefits of the study

This report provides an extensive analysis of the current and emerging market trends and dynamics in the world control valve market

Geographically, the control valve market is analyzed based on various regions such as North America, Europe, Asia-Pacific and LAMEA

This study evaluating competitive landscape and value chain has been taken into account to help in understanding the competitive environment across the geographies

This report entails the detailed quantitative analysis of the current market and estimations through 2014-2022, which assists in identifying the prevailing market opportunities

SWOT analysis highlights the internal environment of the leading companies for effective strategy formulation

This report provides the quantitative analysis of the current market and estimations through 2014-2022, which assists in identifying the prevailing market opportunities

Extensive analysis of the market is conducted by following key product positioning and monitoring the top competitors within the market framework

CHAPTER 1 INTRODUCTION

- 1.1 Report description
- 1.2 Key benefits
- 1.3 Key market segments
- 1.4 Research methodology
 - 1.4.1 Secondary research
 - 1.4.2 Primary research
 - 1.4.3 Analyst tools and models

CHAPTER 2 EXECUTIVE SUMMARY

- 2.1 Overview
- 2.2 Market snapshot
- 2.3 CXO perspective

CHAPTER 3 MARKET OVERVIEW

- 3.1 Market definition and scope
- 3.2 Key findings
 - 3.2.1 Top impacting factor
 - 3.2.2 Top winning strategies
 - 3.2.3 Top investment pockets
- 3.3 Porters five forces analysis
 - 3.3.1 Moderate bargaining power of suppliers due to large number of suppliers and low switching cost
 - 3.3.2 High bargaining power of buyers due to high demand in oil & gas and many players that provide quality product
 - 3.3.3 Moderate threat of substitution from internal substitutes
 - 3.3.4 Low threat of new entrants due to high initial investment
 - 3.3.5 Presence of numerous players, moderate brand loyalty, low switching cost increases the competition among rivalries
- 3.4 Market share analysis, 2015
- 3.5 Drivers
 - 3.5.1 Booming oil & gas and power industries
 - 3.5.2 Demand for control valves in the pharmaceutical and food & beverage industries
 - 3.5.3 Rising number of industrial infrastructure projects in developing countries

- 3.5.4 Gradual increase in the need for automation in the process industries
- 3.6 Restraints
 - 3.6.1 Competition from domestic manufacturers
- 3.7 Opportunities
 - 3.7.1 Emerging economies are boosting their investment in Hydrocarbons
