Abstracts

The global X-ray detector market was valued at \$5.12 billion in 2019, and is projected to reach \$8.87 billion by 2027, registering a CAGR of 6.4% from 2020 to 2027.

X-ray detectors are the devices which are used to measure the flux, spatial distribution, spectrum, and other properties of X-rays. When X-rays travelling through the body, it also passes through an X-ray detector on the other side of the patient and formed an image. There are different types of X-ray detectors such as flat panel detectors (FPDs), charge-coupled device detectors (CCDs), line scan detector, and computed radiography plates/cassettes. These are used for the various application including medical, veterinary, security, dental, and industrial.

Major factors that affects the growth of the global X-ray detector market are rise in demand for digital imaging technologies, advantages of digital X-ray detectors, and favorable reimbursement policies for X-rays drive growth of the global X-ray detector market. However, high cost associated with digital x-ray detectors and lack of skilled professionals restrain the market growth. On the contrary, rise in demand for wireless X-ray detectors and growth in medical tourism in developing countries are expected to offer significant growth opportunities for the players in the near future.

The global X-ray detector market is segmented into type, application, and region. By type, the market is segmented into flat panel detectors (FPDs), charge-coupled device detectors (CCDs), line scan detector, and computed radiography plates/cassettes. Further, the flat panel detectors segment is sub-divided into indirect capture FPDs and direct capture FPDs. In addition, the flat panel detectors segment is also categorized, on the basis of panel size, into small area FPDs and large area FPDs. By application, the market is segmented into medical, veterinary, security, dental, and industrial. Moreover, the medical segment is divided into static imaging and dynamic imaging. Furthermore, static imaging is categorized on the basis of indication into oncology and others. Region wise, the market analyzed across North America, Europe, Asia-Pacific, and LAMEA.
