Abstracts

Recent developments in Armenian economy shows that agriculture becomes the most important sector for the country. The share of agriculture in GDP reaches 19-20% which makes Armenia as one of the leaders compared to other countries in Europe and central Asia. What drives agriculture development in Armenia? What are the further development ways? This research focused on the development trends of the Industrial Agriculture sector in Armenia, and in particular greenhouse farms, orcharding and fish-breeding. Except secondary data the report analyses also information gathered through sample survey of companies acting in the given industries.

This research:

- Includes an overview of the macroeconomic situation in Armenia

- Gives an overview of the agricultural industry in Armenia with the main focus on greenhouse farms, orcharding and fish-breeding

- Provides data on the production and foreign trade volumes in the mentioned industries

- Estimates the development opportunities, risks and threats in the mentioned industries

- Gives comparative analysis with peer countries

- Provides an overview of regulatory framework and benefits
