Abstracts

This study focuses on China's PCs and Peripherals industry forecasts. In the two past decades, the industry has been growing at a fast pace. The dramatic expansions of the manufacturing capabilities and rising consumer consumptions in China have transformed China's society and economy. China is one of the world's major producers for industrial and consumer products. Far outpacing other economies in the world, China is the world's fastest growing market for the consumptions of goods and services. The Chinese economy maintains a high speed growth which has been stimulated by the consecutive increases of industrial output, imports & exports, consumer consumption and capital investment for over two decades. Rapid consolidation between medium and large players is anticipated since the Chinese government has been encouraging industry consolidation with an effort to regulate the industry and to improve competitiveness in the world market.

Although China has enjoyed the benefits of an expanding market for production and distribution, the industry is suffering from minimal innovation and investment in R&D and new product development. The sector's economies of scale have yet to be achieved. Most domestic manufacturers lack the autonomic intellectual property and financial resources to develop their own brand name products.

This new study focuses on industry trends and forecasts with historical data (2012, 2017 and 2022) and long-term forecasts through 2027 and 2032 are presented. The primary and secondary research is done in China in order to access up-to-date government regulations, market information and industry data. Data were collected from the Chinese government publications, Chinese language newspapers and magazines, industry associations, local governments' industry bureaus, industry publications, and our in-house databases.

Asia Market Info & Dev Co. is one of the leading sources for up-to-date market

information and research on the fastest-growing Chinese markets. We have published over 1,500 reports focusing on the Chinese markets, industry forecasts and company profiles. We provide hard-to-find market data and analyses. Our publications are intended to help international marketers identify business opportunities and promote their product sales in the Chinese markets.

Contents

I. INTRODUCTION

Report Scope and Methodology Executive Summary

II. BUSINESS ENVIRONMENT

Economic Outlook

Key Economic Indicators

Industrial Output

Population and Labor

Foreign Investment

Foreign Trade

Banking System and Regulations

Foreign Exchange

Taxes, Tariff and Custom Duties

IV. PCS AND PERIPHERALS PRODUCTION AND DEMAND

Overview

PCs Production and Demand

Major PC Suppliers

PCs Production and Demand

Laptop Production and Demand

Major Laptop Suppliers

Laptop Production and Demand

High-End Intel-Based Server Production and Demand

Major High-End Server Suppliers

High-End Server Production and Demand

Printer Production and Demand

Major Printer Suppliers

Printer Production and Demand

Scanner Production and Demand

Major Scanner Suppliers

Scanner Production and Demand

Modem Production and Demand

Major Modem Suppliers
Modem Production and Demand
Other Peripherals Production and Demand
Major Other Peripherals Suppliers
Other Peripherals Production and Demand
PCs and Peripherals Imports and Exports
