Abstracts

Online gaming sector is growing globally though it is facing some restrictions in varied countries as technology is evolving, leaving a significant impact on the industry. The global online gaming market has grown at a CAGR of 18.21% during the period 2002-2010. Europe stands on top, accounting for the largest market share of the global online gaming market, closely followed by North America.

Asia-Pacific is offering many opportunities and strong potential for the gambling industry. Macau is the leading gambling hub in APAC region. In 2009, Asian casinos grew by 3.41% and showed positive growth in the first half of 2010 (2.88%) as compared to the same period last year. In China, sports lottery accounted for 41.88% of the total lottery market while welfare lottery contributed 58.12%. Macau gaming industry is developing with a strong growth rate compared to other Asian countries driven by rising number of tourist arrivals and growing middle class income level.

Rising income level in middle class along with growing trend of working women has worked as a driving factor for casino and gaming industry in Asia Pacific. Casino industry in the region was even resilient in the phase of recession and showed a positive performance in 2009.

The report on "Asia-Pacific Casino and Gaming Sector - Focus on China and Macau" includes a detailed study of casino and gaming industry performance in overall region. The report further discusses the industry environment in Macau, China, Singapore, and New Zealand. We have analyzed industry with segmentations and trends prevailing in the market. The report also includes Global, China and Macau casino and gaming industry forecast. Additionally, we have discussed cause and effect relationship of macroeconomic and industry factors on the industry providing the basis for the future

outlook.
