Abstracts

The report titled “Europe Fuel Cell Market Outlook to 2018 - Integration of Hydrogen in Fuel Cells to Drive Commercialization” presents a comprehensive analysis of the industry covering aspects including market size by volume and capacity shipments and market segmentation by applications (transportation, static and portable), by types (DMFC, PEMFC and SOFC) and by geography. The report also entails a detailed description on the recent trends and developments in the market and the competitive scenario of major players in the industry along with the market share of major companies in Europe and in respective countries operating in fuel cell market (Germany, UK and Denmark).

The fuel cell market in Europe has been driven by developments in stationary fuel cells, rising environmental concerns, diversification of energy portfolio to achieve energy security, ability of fuel cells to provide distributed power and upcoming technological innovations to manufacture cost effective fuel cells. The fuel cell market shipments in Europe have witnessed astonishing growth at a substantial CAGR of 12.7% during the period 2008-2013. Stationary applications of fuel cells commenced from the year 2009 with minimal contribution of ~% in 2009 escalated to ~% of the total volume shipments by the year 2012 in Europe. PEMFC are the second most utilized fuel cells and have contributed a share of ~%, thereby accounting to ~ MW of capacity shipments in the year 2013 in the Europe fuel cell market. The fuel cell shipments in Europe have registered double digit growth at a gigantic CAGR of ~% during the review period 2008-2013. Europe fuel cell market segmentation by fuel types predominantly utilizes DMFC fuel cells for transportation and portable applications. These fuel cells have accounted for a largest market share of ~% during the year 2013.

Germany is the leading country in terms of capacity shipments in Europe fuel cell

market. The country has acquired a dominating share of ~%, thereby resulting in ~ MW of capacity shipments in the year 2013. The UK has contributed to ~% of the total shipments in Europe by extensively combining hydrogen fuel with fuel cell technology. It is estimated that the overall Europe fuel cell market has grown from USD ~ million in the year 2012 to USD ~ million in 2013.

In early 2013, M&A activities were at the mainstay of fuel cell market in Europe. The fuel cell related announcements in the automotive industry with Toyota and BMW jointly agreeing to develop fuel cells for leveraging greater economies of scale. Through M&A, acquiring a competitor's intellectual property can accelerate product development, open new markets and helps to overcome technological issues.

The capacity shipments in Europe are forecasted to increase from ~ MW in the year 2014 to ~ MW by the year 2018. Europe fuel cell market is likely to grow due to rapid shift to market driven commercialization of the fuel cell industry. The competitive pricing in the fuel cell market place, improvements in efficient manufacturing, high volume production capacities, lean supply chain are the major features which the fuel cell market players in Europe need to address for gaining market confidence. It is predicted that fuel cell industry is likely to rise stupendously in the forthcoming years peculiarly in UK followed by Germany.

KEY TOPICS COVERED IN THE REPORT:

Europe fuel cell market size in terms of volume shipments and capacity shipments (2008 - 2013)

Europe fuel cell market segmentation by applications (transportation, static and portable), 2008-2012

Europe fuel cell market segmentation by fuel cell types (DMFC, PEMFC and SOFC) and by geography, 2013

Trends and developments, key policies and investments in fuel cell market in Europe

Cost drivers and cost benefit analysis for fuel cell

Porters five forces, SWOT analysis

Growth drivers and challenges for Europe fuel cell market

Major activities in Europe fuel cell market by countries (Germany the UK, Denmark)

Competitive landscape of fuel cell market by major players in different countries with their market shares (SFC Energy, ABSL, P21, IRD and others)

Company profiles with business strategies and financial performance of the fuel companies operating in Europe fuel cell market (SFC Energy, Ceres Power, AFC Energy, H2Logic and others)

Future outlook & projections and macro economic factors of Europe fuel cell market

Contents

1. EUROPE FUEL CELL MARKET INTRODUCTION

1.1. Fuel Cell Technology and Operations

Technological Advancements

1.2. Fuel Cell Types and its Applications

Types of Fuel Cells (Polymer Electrolyte Membrane, Direct Methanol, Solid Oxide, Phosphoric Acid, Molten Carbonate)

Applications of Fuel Cells (Stationary, Transportation, Portable)

1.3. Europe Fuel Cell Industry Value Chain

1.4. Cost Structure of Developing Fuel Cell Systems

2. EUROPE FUEL CELL MARKET SIZE

2.1. By Shipments in Volume, 2008-2013

2.2. By Capacity Shipments, 2008-2013

3. EUROPE FUEL CELL MARKET SEGMENTATION

3.1. By Applications (Transportation, Stationary and Portable), 2008-2012

3.1.1. Transport and Refueling Infrastructure

3.2. By Fuel Cell Types (DMFC, PEMFC, SOFC), 2013

3.3. By Geography, 2013

4. TRENDS & DEVELOPMENTS IN EUROPE FUEL CELL MARKET

5. INVESTMENTS IN EUROPE FUEL CELL INDUSTRY

Germany

The UK

Denmark

6. COST DRIVERS AND COST BENEFIT ANALYSIS FOR FUEL CELL

7. KEY GROWTH DRIVERS AND CHALLENGES FOR EUROPE FUEL CELL MARKET

Growth Drivers

Challenges

8. EUROPE FUEL CELL INDUSTRY POLICIES

8.1. European Union Policy Framework

8.2. R&D Activities and Funding

8.3. Market Entry Propositions & Barriers for Start Ups

8.4. Major Activities in Europe Fuel Cell Market By Countries

8.4.1. Fuel Cell Market in Germany: Overview

Role of Government & Institutions in Germany Fuel Cell Industry

Germany Fuel Cell Systems Existing Markets

Demonstration Projects in Germany

8.4.1.1. Germany Fuel Cell Market Size

By Shipments in Volume, 2009-2012

By Capacity Shipments in Megawatts, 2008-2013

8.4.1.2. Germany Fuel Cell Market Segmentation

By Fuel Cell Systems Development from Germany

By Small Stationary Installed Fuel Cell Systems in Germany

By Large Stationary Installed Fuel Cell Systems in Germany

8.4.1.3. Market Share of Major Companies Operating in Germany Fuel Cell Market, 2013

8.4.2. Fuel Cell Market in the UK: Overview

Initiatives Propelling Fuel Cell Industry in the UK

8.4.2.1. Market Share of Major Companies Operating in the UK Fuel Cell Market, 2013

8.4.2.2. Future Outlook & Projections of the UK Fuel cell Market, 2015-2030

By Projected FCEV Sales in the UK, 2015-2030

By Projected Hydrogen Refueling Stations (HRS) Deployments in the UK, 2015-2030

8.4.3. Fuel Cell Market in Denmark: Overview

8.4.3.1. Market Share of Major Companies Operating in Denmark Fuel Cell Market, 2013

9. COMPETITIVE LANDSCAPE OF FUEL CELL MARKET

9.1. By Major Players, 2013

9.2. By Peer Resources in Renewable Energy

10. PORTERS FIVE FORCES MODEL-EUROPE FUEL CELL MARKET

11. SWOT ANALYSIS OF EUROPE FUEL CELL MARKET

12. COMPANY PROFILES OF MAJOR COMPANIES IN EUROPE FUEL CELL MARKET

12.1. SFC Energy

12.1.1. Business Overview

12.1.2. Business Strategies

12.1.3. Financial Performance, 2008-2013

12.2. Ceres Power

12.2.1. Business overview

12.2.2. Business Strategies

12.2.3. Financial Performance, 2008-2013

12.3. AFC Energy

12.3.1. Business Overview

12.3.2. Business Strategies

12.3.3. Financial Performance, 2010-2013

12.4. H2Logic

12.4.1. Business Overview

12.4.2. Business Strategies

12.4.3. Financial Performance, 2008-2013

12.5. Haldor Topsoe Fuel Cell

12.5.1. Business Overview

12.5.2. Business Strategies

12.5.3. Financial Performance, 2008-2013

13. EUROPE FUEL CELL MARKET FUTURE OUTLOOK

Commercialization of Fuel Cells

Fuel Cell Technology Development

13.1. Europe Fuel Cell Market Future Projections, 2014-2018

13.1.1. By Fuel Cell Shipments in Volume, 2014-2018

13.1.2. By Fuel Cell Capacity Shipments in Megawatts, 2014-2018

13.2. Cause and Effect Relationship Analysis of Europe Fuel Cell Market

14. MACRO ECONOMIC FACTORS: HISTORICAL AND PROJECTIONS

14.1. Carbon Dioxide Emissions, 2010-2018

14.2. Fuel Cell System Cost in Europe, 2010-2018

14.3. Cost of Hydrogen in Europe, 2010-2018

14.4. Hydrogen Refueling Stations Operated in Europe, 2008-2014

14.5. Utilization Rate of Hydrogen Refueling Stations in Europe, 2010-2018

15. APPENDIX

15.1. Market Definitions

15.2. Abbreviations

15.3. Research Methodology

Data Collection Methods

Approach

Variables (Dependent and Independent)

Multi Factor Based Sensitivity Model

Final Conclusion

15.4. Disclaimer
