The supply and demand chain of naphtha in UAE affects the countries across the globe, as the country exports its entire naphtha production. The potential factors affecting naphtha production and exports in UAE are oil production, prices and demand in refineries, petrochemicals and chemical industry due to the diversifying product portfolio obtained from naphtha. Middle East Naphtha Market has witnessed an appreciable growth at a CAGR of 7.7% during the period 2007-2013. UAE is the third largest country operating in Middle East naphtha market. UAE naphtha market export statistics have already mounted at a noticeable CAGR of 11.6% during the review period 2007-2013.

Naphtha is a precursor for wide range of petrochemical and chemical products. The naphtha production by refineries has witnessed a substantial growth at a CAGR of 18.6% during the period 2007-2013. The naphtha production from plants accounted for 54.2% of the total production of ~ thousand tons in the country in 2008. The naphtha which is consumed for petrochemicals production is not utilized for indigenous use but rather exported to other countries by UAE.

ADNOC is the leading producer of naphtha, thereby commanding a market share of ~%

through naphtha production from its refineries in the year 2013. International Petroleum Investment Company (IPIC) is the second largest naphtha producing company through its refinery and other plant operations and accounted for ~% of market share in UAE naphtha market

UAE is predicted to witness a huge surge in naphtha production.
