### Summary

This report studies the Chiral HPLC Column market, Chiral HPLC column is an instrument used in chiral column chromatography which can separate chiral isomers (enantiomeric compounds).

Chiral column chromatography is a variant of column chromatography in which the stationary phase contains a single enantiomer of a chiral compound rather than being achiral. The two enantiomers of the same analyte compound differ in affinity to the single-enantiomer stationary phase and therefore they exit the column at different times.
