## Abstracts

In general, Gambling is betting on the outcome of a game or an event that may have an uncertain result. Usually, it comprises putting a specific amount of money on stake, in the hope of gaining more. Therefore, it is safe to say that Gambling is an activity that depends on the player's lucky stars as well as their choice of outlet. There are many non Gamstop casinos that assist the players during the experience, highlighting that it has nothing to do with that person's experience, skills and competences.

Today, some of the most popular gambling activities are video slots, progressive slots, online casino games and table games that include Craps, Video Poker, Roulette, Baccarat, and Blackjack. In some countries across the world, the governments tend to control or regulate the act of gambling since it is addictive in nature and has led many people to lose a large amount of money in the hope of making it big fortune through gambling.

Betting, on the other hand, is considered to be a form of gambling. More precisely, betting is all about predicting the outcome of a future event and placing a wage on that outcome. Officially, Betting is identified as an organised commercial activity between two parties – there is one that predicts an outcome and places a bet and the other who either forfeits the bet or pays the agreed money to the player.

In other words, betting companies such as casinos invite their members to place bets and cash out the winnings according to the bets that are waged by players. Some of the most popular ways on Betting nowadays include casino games, sports, horse racing, or just any important events taking place anywhere in the world.

The statistical scope of this report covers the legally regulated Gambling & Betting market, which does not include illegal.
