Abstracts

Animal Feed Supplements are enzyme supplements, phosphate, calcium and trace mineral mixtures that can be given to grazing animals during the dry or rainy season. These animal feed supplements can be mixed with fodder and have an extra shelf life.

Animal nutrition focuses on the dietary needs of animals, primarily those in agriculture and food production, but also in zoos, aquariums, and wildlife management. Feed additives are products used in animal nutrition for purposes of improving the quality of feed and the quality of food from animal origin, or to improve the animals' performance and health, e.g. providing enhanced digestibility of the feed materials.
