Abstracts

Automotive Wrap Films is long-term, removable, dual cast films designed for solid color passenger vehicle detailing, decoration and full wraps and provide excellent opacity to hide high-contrast surfaces

These films are primarily used for the purposes – first being to change or enhance the appearance of a vehicle and the second being to safeguard the original paint from dust and corrosion. One single wrap on a vehicle can last up to five years – making it a relatively affordable option. Continuous growth in the Pre-owned car markets has also led to the increase in demand of wrap films as the major scratches, improper paint and other defects can be made unnoticeable with the help of the wrap films. Globally, automotive wrap films witness significant demand, due to rising consumer interest towards paint protection and colour change films.
