Summary

The Push–pull connector was invented by Swiss connector manufacturer LEMO and is a type of cable interconnect that provides a strong locking mechanism that is only released by squeezing the connector body, preventing accidental disconnects. The connector is cylindrical, enabling a wide range of body styles and configurations such as low or high voltage multipin, coaxial, triaxial, fluid and gas. Fischer Connectors and Lemo are well-known Swiss manufacturing company that are leaders in developing and manufacturing broad range of circular push-pull connectors. LEMO, Molex, TE Connectivity, Amphenol, ITT Cannon, Fischer Connectors, Hirose, ODU, Esterline Connection, Binder are top global players in Circular push pull connector market.

Circular push pull connectors offer light weight and assure high reliability and durability as well as easy push-pull operation. You may apply our connectors to all kinds of small-sized electronic equipment requiring high reliability. These simple but refined connectors are most suitable for portable electronic equipment which requires good appearance. Besides, key system permits only one way of coupling so that you can find right position to connect even when blind mating.
