Summary

Cyber Security is the body of technologies, processes and practices designed to protect networks, computers, programs and data from major cyber threats, such as cyber terrorism, cyber warfare, and cyber espionage. In their most disruptive form, cyber threats take aim at secret, political, military, or infrastructural assets of a nation, or its people. In a computing context, security includes both Cyber Security and physical security.

Cyber Terrorism

Cyber terrorism is the disruptive use of information technology by terrorist groups to further their ideological or political agenda. This takes the form of attacks on networks, computer systems, and telecommunication infrastructures.

Cyber Warfare

Cyber warfare involves nation-states using information technology to penetrate another nation's networks to cause damage or disruption. In the US and many other nation-states, cyber warfare has been acknowledged as the fifth domain of warfare (following land, sea, air, and space). Cyber warfare attacks are primarily executed by hackers who are well trained in exploiting the intricacies of computer networks and operate under the auspices and support of the nation-states. Rather than "shutting down" a target's key networks, a cyber-warfare attack may intrude networks for the purpose of compromising valuable data, degrading communications, impairing infrastructural services such as

transportation and medical services, or interrupting commerce.

Cyber Espionage

Cyber espionage is the practice of using information technology to obtain secret information without permission from its owners or holders. Cyber espionage is most often used to gain strategic, economic, political, or military advantage. It is conducted through the use of cracking techniques and malware.

With cyber threats in a state of rapid and continuous evolution, keeping pace in cyber security strategy and operations is a major challenge to governments. Cyber security is a serious concern to private enterprise as well, given the threat to intellectual property and privately-held critical infrastructure.
