Abstracts

A financial lease is a method used by a business for acquisition of equipment with payment structured over time. To give proper definition, it can be expressed as an agreement wherein the lessor receives lease payments for the covering of ownership costs. Moreover, the lessor holds the responsibility of maintenance, taxes, and insurance.

A financial lease is similar to an out-and-out purchase transaction which has been financed through a term loan, in that the payments are made on a monthly basis. However, unlike an out-and-out purchase transaction in that the lessee doesn't present the obligated balance as debt, shows payments as expensed, and retains the equipment title. During the lease period, the finance company is considered as the legal owner of the asset.

According to APO Research, The global Finance Lease market is projected to grow from US\$ million in 2024 to US\$ million by 2030, at a Compound Annual Growth Rate (CAGR) of % during the forecast period.

The most share of application in global Finance Lease market is TMT, which has a nearly 25% share, followed by automotive and ECI.
