## Abstracts

Football Helmets is a piece of protective equipment used mainly in American football and Canadian football. It consists of a hard-plastic shell with thick padding on the inside, a face mask made of one or more plastic-coated metal bars, and a chinstrap. Each position has a different type of face mask to balance protection and visibility, and some players add polycarbonate visors to their helmets, which are used to protect their eyes from glare and impacts. Helmets are a requirement at all levels of organized football, except for non-tackle variations such as flag football. Although they are protective, players can and do still suffer head injuries such as concussions.

According to APO Research, The global Football Helmet market was estimated at US\$ million in 2023 and is projected to reach a revised size of US\$ million by 2030, witnessing a CAGR of xx% during the forecast period 2024-2030.

Global Football Helmet key players include Riddell, Schutt, etc. Global top two manufacturers hold a share about 80%.

North America is the largest market, with a share about 88%, followed by Asia-Pacific and Europe, both have a share about 10 percent.
