Abstracts

Glass partitions or (glass partition walls) are high-quality, non-load-bearing panes of glass that function as room dividers. Glass partition walls are great for opening up a room and creating open, airy work environments. Partition wall systems are typically full glass (ceiling to wall) partitions. Aluminum frames or other mounting hardware hold these systems in place.

As a building material, this interior glass allows designers and architects to divide a room, without sacrificing floor space and light diffusion. Glass partition walls are ideal for creating comfortable and practical office working environments. When you allow natural light to flow into a given space, it changes how shapes, colours, patterns, textures and people interact. Glass partition walls are also one of the simplest ways to update an office or commercial space.
