## Abstracts

Hadoop, the Apache Hadoop developed by Apache Software Foundation, is an open-source software framework for storing data and running applications on clusters of commodity hardware. It provides massive storage for any kind of data, enormous processing power and the ability to handle virtually limitless concurrent tasks or jobs.

The base Apache Hadoop framework is composed of the following modules:

? Hadoop Common – contains libraries and utilities needed by other Hadoop modules

? Hadoop Distributed File System (HDFS) – a distributed file-system that stores data on commodity machines, providing very high aggregate bandwidth across the cluster;

? Hadoop YARN – a platform responsible for managing computing resources in clusters and using them for scheduling users' applications; and

? Hadoop MapReduce – an implementation of the MapReduce programming model for large-scale data processing.

According to APO Research, The global Hadoop market is projected to grow from US\$ million in 2024 to US\$ million by 2030, at a Compound Annual Growth Rate (CAGR) of % during the forecast period.

Global Hadoop main players are Cloudera, Hortonworks, MapR Tech, IBM, etc. Global top four manufacturers hold a share over 55%. North America is the largest market, with a share nearly 50%.
