Summary

Hair Dyes are chemicals that used to change hair color. Today, hair dyes are widely used, either to cover up grey hairs, or simply by those wanting to change their natural hair colour.

Hair Dyes come in many shades, neutral (blond, brown, etc.) and unneutral (orange, green, pink, red, blue, etc.). There are three kinds of hair dyes,

? Permanent color is what people mean when they say 'hair dye' or 'color-treated hair.' There are two parts to the permanent process: opening up the hair shaft and adding color.

? Semi- & Demi-Permanent color, also called hair gloss, simply adds color, the main difference is that Semi- & Demi-Permanent color doesn't open up your hair shaft before adding color.

? Temporary hair colors that merely sit on the surface of the hair and are washed out with the next shampoo.

There are many brands of hair dyes and they can be found at your local target, walmart, any stores like that, also at Hot Topic, Discontent, etc.
