Summary

This report studies the Hard Coating Film market. Hard Coating Film shows excellent scratch resistance, good chemical resistance and high lifetime when used under challenging environments.

A hard coat, can be defined as a protective polymer applied to a substrate for abrasion, chemical resistance or other surface characteristics. The thickness of the hard coat typically ranges from about 1 μ m to about 20 μ m depending on the polymer and the application technique. Today's hard coats and the substrates on which they are applied are becoming more end-use specific and in many cases, customer specific.
