Abstracts

Inkjet heads also call inkjet print head is the core of inkjet printer. It is used on the industrial and commercial and office inkjet printer.

Inkjet print head can be divided into two categories by printing method: continuous print head and drop-on-demand print head. As continuous print head is waste of ink and print dots are large, the major manufacturers use the drop-on-demand print head.

The DOD arena breaks into Thermal Inkjet ('TIJ') and Piezoelectric Inkjet ('PIJ'). TIJ is widely used in the graphic arts market. PIJ heads work by applying voltage pulses to a piezoelectric material, which deforms in response and so ejects ink droplets from a chamber via a carefully engineered nozzle. Each printhead has hundreds or thousands of such chambers and nozzles
