### Summary

A lift chair is an adjustable seat that is machine powered. One can switch from the sitting to rest position (or other positions) with a remote control. It also has an up position where the chair supports up and forward to push the sitter into the standing position. This is where the lift chair originates its name, for it lifts the sitter up. Lift chairs are proposed for individuals who find it difficult to stand up from a chair such as those with severe arthritis in the knees or hips.

Lift Chair can be useful to the elderly, infirm, or disabled. There are certain situations, including some medical conditions, where you will need to practice operating the lift chair in the presence of a trained attendant. A trained attendant can be defined as a family member or healthcare professional specially trained in assisting you with performing various daily living activities while safely operating a lift chair.
