## Abstracts

This report studies the Linear Guide Rail market, a Linear Guide (Linear rolling guide) allows a type of linear motion that utilizes rolling balls. By using circulating balls between the rail and the block, a Linear Guide can achieve high precision linear motion. Compared to a traditional slide, the coefficient of friction for a Linear Guide is only 1/50th. Because of the restraint effect between the rails and the blocks, Linear Guides can take up loads in both the up/down and the left/right directions. With these features, Linear Guides can greatly enhance moving accuracy; it is especially true when accompanied with precision ballscrews.

According to APO Research, The global Linear Guide market was estimated at US\$ million in 2023 and is projected to reach a revised size of US\$ million by 2030, witnessing a CAGR of xx% during the forecast period 2024-2030.

Global linear guide key players include THK, Hiwin, Bosch Rexroth, etc. Global top 5 manufacturers hold a share over 77%.

China is the largest market, with a share about 25%, followed by Europe and Japan, both have a share about 38 percent. In terms of product, ball guide rail is the largest segment, with a share over 65%. And in terms of application, the largest application is precision electronic machinery, followed by automation equipment.
