Abstracts

OVP or Online Video Platforms can use a user-generated content (UGC) model, software as a service (SaaS) business model or a do it yourself (DIY) model. OVP offers an end to end solution from creating a website, uploading video, encoding video, video playback to user management for both video on demand and live streaming. Usually, OVPs have Content Management System (CMS) where users need to login to add content, upload video, setting up monetization plan, view video analytics which may include, detailed insights of video performance such as, video watch time, total number of video views, unique views and impressions; stats on user visits, location and behavior on the site. OVPs also provide customized video players where end users can watch videos. Many OVPs provide third party video player which can be embedded in a website. Although there are several OVP providers that are also present in broadcast markets, serving video on demand set-top boxes, OVPs are related to the over-the-top (OTT) content video industry.

In this report, we defines OVPs as fee-based, software-as-a-service (SaaS) online content businesses that enable content owners to ingest, transcode, store, manage, protect, publish, syndicate, track and monetize online video.
